# CYBERSEC 2022

The first edition of Cybersec2022 kicks off! The event is promoted by Cybersecurity Italia, the online newspaper thought to be a meeting point for companies and experts interested in the balanced growth of the Country's security system, its Public Administrations and enterprises, with the aim of communicating with Institutions, political decision-makers, Regulatory Authorities, experts in the field, researchers and the academia.

Cybersecurity has by now become a strategic area for all the Countries, ranging from Defence & Security to industrial policy, technological development and geopolitical implications.

Cybersec2022 will provide a broad overview of the current challenges related to cybersecurity, which today involve the main industrialised countries worldwide. In this context, plenty of time will be dedicated to Italy and Europe, with an eye to the investment and governance strategy included by the Italian Government into the National Recovery and Resilience Plan – NRRP (Piano Nazionale di Ripresa e Resilienza, PNRR), which provides for the assignment of 620 million Euro and the creation of the newly founded National Cybersecurity Agency (Agenzia Nazionale per la Cybersecurity, ACN).

Cybersec2022 will also be a great networking opportunity: a strategic meeting-point for businesses, the academic system and decision-makers.

## ATTENDEES

Distinguished representatives from Public Institutions (*i.e.*, Government and Parliament) as well as C-suite from top-rated Italian and foreign companies will join Cybersec2022 Conference.

The speakers will be cherry-picked from a shortlist of top managers active in the areas to be discussed at the event. Cybersecurity Italia will draft and deliver individual invitations directly to the speakers, checking on their availability and ensuring the highest and most qualified attendance possible.

## ON LINE and ON SITE

Cybersec2022 will be a hybrid event: set up in a prestigious location, a TV studio will accommodate the speakers and a number of selected guests on site, still allowing other participants to attend the event online in live streaming. A virtual meeting will take place thanks to a high-quality and reliable tool, connecting a large audience and speakers interactively.
