

Ermes: about Us

Our Story

In 2017, researchers of Electronic and Telecommunication Engineering at the Polytechnic of Turin (PoliTO) understood that the great changes the Web was protagonist of were about to change cyberattacks nature and the whole surrounding ecosystem as well, targeting the human being as the perfect attack vector: from this intuition, Ermes was born.

Our people

We are sure that people make the difference! This is why we continuously strive to make Ermes the best place to work by attracting the best talents. We have a leadership team with 45+ years of expertise, and we have drafted a special program dedicated to our top players employees with a dedicated rewards plan.

Our idea of Sustainability

In Ermes, we believe that it is impossible to create value without preserving the world we live in. That's why Ermes adopted an internal plan in 2020 with the goal of being able to become a net-zero carbon company by 2024. In addition, Ermes' technology is designed to provide greater sustainability through the energy saved by reducing network bandwidth by 25%, saving 150 trees per year for every 1,000 devices using Ermes.

Our customers and direct partners

We have been chosen by the best companies in all sectors such as KPMG, Carrefour, Reale Mutua, Bonelli Errede, Sol Group, International School of Monaco. Our product is distributed by Techdata and Icos to more than 40 partners in 4 different continents.

Ermes - The last mile defense **in a race against time**

Ermes – Intelligent Web Protection

We live in a world **where 85% of cyberattacks leverage people interaction, hitting the target within the first 21 hours causing the most harmful damage.** In a scenario like this, traditional solutions adopting a reputational approach can't properly detect newborn threats like these in time.

Thanks to its innovative architecture and patented AI algorithms, Ermes' revolutionary approach reduces your company window of exposure from **days to minutes** through a behavioral analysis of websites, increasing Web protection **by +25%** vs. Top Security Vendors and guaranteeing an effective **99% real-time protection** on the Web.

One Technology, **multiple advantages**

Guarantee to your employees an effective 99% real-time protection on the web

Window of exposure reduced from days to minutes: best solution in the first 24h

Simply access the Dashboard in the Cloud or Integrate with your SIEM

Advanced 0Day Technology to spot new phishing websites and identify suspicious extensions

Risk of clicking on malicious links reduced to zero

150 trees saved/year every 1000 devices with Ermes and +30% bandwidth saving
